

OPEN SOURCE SIX SIGMA

Turnkey eLearning - White Label Solutions

Publish Date: February 2011

Open Source Six Sigma

Overview

Located in the sunny golf mecca of Scottsdale Arizona, Open Source Six Sigma (OSSS) was founded in 2007 and has rapidly grown to become the industry leading licensor and distributor of Lean Six Sigma Intellectual Property.

The OSSS Products are utilized by thousands of professionals and leading Fortune 1000 Corporations to deliver Master Black Belt, Black Belt, Green Belt and Yellow Belt, Executive, Champion and Team Members training to thousands of trainees in multiple industries within various disciplines and have contributed a significant bottom-line financial impact for many organizations.

Mission

Open Source Six Sigma exists to provide intellectual property to the Business Improvement community. OSSS serves as a center which promotes the use of process improvement for the purpose of education and knowledge sharing. It is our commitment to provide economically feasible, High-Quality assets to the community in order to expand and improve the footprint of Lean Six Sigma in our world today.

Operating Space

Open Source Six Sigma is the leading independent licensor and distributor of Lean Six Sigma Intellectual Property in the Industry. OSSS does not provide direct Lean Six Sigma training or consulting services, we exclusively provide products that build and enhance Lean Six Sigma efforts. For a partial list of OSSS Clients visit:

White Label Solutions

Overview

Open Source Six Sigma is known for its innovative solutions, high-quality products, simple licensing and straightforward pricing. It is with this spirit that we have designed our Turnkey White Label eLearning Solutions. Whether you are a University, Non-Profit, Consultancy, Small, Medium or Large-size Organization, the Open Source Six Sigma eLearning Solutions are the Higher Quality, Lower Cost, Faster Solution to running your own online Lean Six Sigma program.

eLearning Course Content

For organizations with their own Learning Management Systems we've come up with a White Label Content Solution.

This allows your organization the ability to publish our world-class courses into your own Learning Management System. Our content is the most trusted and popular Lean Six Sigma content on the face of the earth, and to make matters better, you can White Label and even customize it to your own specific needs!

eLearning Suite

This solution couples our industry leading course content with a fully hosted and fully managed Learning Management System (LMS) branded specifically to your organization.

Our solution is hosted behind an enterprise grade-firewall and with the latest security and daily backups. Unlimited users, 1 terabyte of bandwidth allowance per month and plenty of storage. Our White Label eLearning System & Content Solution encompasses everything necessary to deliver online Lean Six Sigma training within a matter of days!

Learning Management System

Overview

Clients who choose to use our eLearning System Solution receive one of the top performing Learning Management Systems in the industry. Most Learning Management Systems are complicated, clunky and expensive, packed to the tilt with every feature that could possibly be conceived of. Our Learning Management System tackles online training from an entirely different perspective: A focus on Simplicity, Smart Functionality and most importantly People.

Features

Create user accounts, organize people into groups, assign courses & assessments.

- * No restrictions on users. Add as many users and administrators as you require! Add users manually or upload tons of them. You can even allow users to register themselves or distribute invite codes for access.
- * Its easy to organize. Create and use Groups to organize people into divisions, departments, companies, schools, classes or any other “buckets” that make sense to you, its your call and we make it easy to do.
- * Creating and managing accounts is simple. Set permissions and roles in a snap. You specify who can see certain courses, people and groups. Approve, delete, archive and re-classify your users as needed.
- * Make assignments and get training done. We make it easy to assign courses to people so you can be sure the right training gets done on time. Set due dates and expiration dates. Automatic notifications and reminders keep users and administrators up-to-date.

Centralize records, view instant reports, track progress.

- * Track all that goes on. Our LMS centralizes all data related to your training program activity into logical universally useable reports. Access people’s performance, check on courses and assessments. Our LMS delivers high-level and detailed reporting that will keep you in the know.
- * Export your data. Need to build custom reports, no problem. Download your data and build away. Export in to excel for manipulation or produce pdf’d reports to take with you.

We guard your data, courses and people with Enterprise grade security.

- * Your account is in good hands! Every LMS account includes SSL security, enterprise-level redundant firewalls, multi-level intrusion protection and DoS/DDoS protection. Our enterprise-level web application firewall (WAF) actively protects your account from sophisticated hacker attacks. Plus we backup your account on a daily basis.

Last but not least...Give it your own unique touch, even our LMS will reflect your own brand.

Lean Six Sigma Course Content

Overview

The Open Source Six Sigma Courses are structured to teach the problem-solving methodology itself so trainees gain an in-depth understanding of the Lean Six Sigma process and how to apply the methodology to projects as opposed to how to use a specific set of tools.

The materials cover theory and are supplemented with step-by-step examples, using Minitab or SigmaXL, depending on the version, when applicable. Trainees build a thorough understanding of when and why they should perform an action (2 sample t-test for example) how to perform that action using Minitab or SigmaXL and how to properly interpret the result of the Minitab or SigmaXL output in both a "statistical" and "practical" sense.

This process in itself creates standardized learning for all trainees along with enough degrees of freedom to integrate company specific examples and supporting content as deemed appropriate by our clients. All of our courses include in-depth explanations.

The Open Source Six Sigma White Label online training courses consist of Black Belt, Green Belt and Yellow Belt Training.

Lean Six Sigma Black Belt Course

- Consist of approximately 180 hours of online training, a total of 100 self-assessment questions presented at the end of each phase of training, various memory joggers to aid students in the learning process are presented throughout.

Lean Six Sigma Green Belt Course

- Consist of approximately 120 hours of online training, a total of 80 self-assessment questions presented at the end of each phase of training, various memory joggers to aid students in the learning process are presented throughout.

Lean Six Sigma Yellow Belt Course

- Consist of approximately 40 hours of online training, a total of 50 self-assessment questions presented at the end of each phase of training, various memory joggers to aid students in the learning process are presented throughout.

Alignment & Standards

Overview

We handle compliance so our clients don't have to! Our eLearning solutions meet the compliance standards of the Lean Six Sigma industry as well as the eLearning industry.

Alignment to Lean Six Sigma Industry Standards

Open Source Six Sigma is an Accredited by the International Association for Six Sigma Certification (IASSC) as an Accredited Curriculum Provider meaning the OSSS Belt courses are highly aligned to the IASSC Bodies of Knowledge. In addition a study conducted in coordination with Bearing Point Consulting determined that the OSSS curriculum matched the DMAIC ASQ Body of Knowledge to a degree greater than 90%.

Alignment to eLearning Industry Standards

All OSSS White Label eLearning products comply with the SCORM standards as defined by ADL.

The Advanced Distributed Learning (ADL) Initiative is a collaborative effort to harness the power of information technologies to deliver high-quality, easily accessible, adaptable, and cost-effective education and training. ADL uses structured and collaborative methods to convene multi-national groups from industry, academia, and government who help to define the specifications and standards for the learning industry and then develop tools and content to those standards.

ADL was established in 1997 to standardize and modernize the delivery of training and education. The Department of Defense (DoD) Office of the Under Secretary of Defense for Training Readiness and Strategy oversees the ADL Initiative. The ADL Initiative developed the Sharable Content Object Reference Model (SCORM®).

Course Content Customization

Overview

Most of our clients choose use our “off-the-shelf” course content with a white label customization. However we offer the options of making significant modifications to our course content and even adding non-Open Source Six Sigma courses into your LMS. Here is how it works.

White Label Customization

Open Source Six Sigma Partners enjoy a true White Label Solution! The only thing of its kind in the Lean Six Sigma Industry white label allows our White Label Clients to use our Intellectual Property under their own brand. We'll customize our standard courses including the integration of our Clients Logo, Copyright Marks and modified Title and closing page for \$750 for Black Belt, \$650 for Green Belt, \$500 for Yellow Belt, or you can do it yourself for free and return the materials to us for rendering and publication to your LMS.

Advanced Customization

When our clients choose to make a significant adjustment to our materials such as changing the way a certain topic is taught they usually do it on their own and simply return the contents to us in order to publish SCORM packages for use in the LMS. Whenever the content of a course is modified it needs to be re-rendered into a SCORM compliant packages. We provide this rendering and publication service to our clients for a fee of \$500 per course.

Intellectual Property Ownership

The Open Source Six Sigma Partner License handles the ownership of the Intellectual Property which always resides with Open Source Six Sigma. However our client who choose to implement advanced customizations may create “Larger Works” and “Modified” versions of an Open Source Six Sigma course. Under this condition Open Source Six Sigma maintains ownership of these by-products. However through provisions dictated within our License Agreement clients may replace the Open Source Six Sigma copyright with their own copyright. Partners are required to make all larger works and modified version available to Open Source Six Sigma for our records through a private secured Project Management System.

For Partners who utilize our eLearning System Solution adding non-Open Source Six Sigma courses is easy! Each course added will simply increase the monthly LMS fee by \$50 per month.

Program Pricing

Overview

Each Solution has its own fixed setup fee while both solutions share the same utilization fee structure shown in the table below.

Solution 1: eLearning System

One time setup fee of \$5495 plus a \$150 per month training system fee.

Solution 2: eLearning Content

One time setup fee of \$5495.

Utilization Fees

Our pricing is based on the utilization of our courses so if you are not using our courses you are not paying. In addition we have broken our utilization fees into three tiers to accommodate volume discounts. All clients start at the 1st tier, quantities are then measured on a cumulative bases over an infinite period of time so once you reach the 3rd tier you'll always enjoy the lowest pricing, permanently.²

	Tier 1		Tier 2		Tier 3	
	Quantity	Price / Person	Quantity	Price / Person	Quantity	Price / Person
Black Belt	1 to 25	\$495	26 to 50	\$395	Over 50	\$295
Green Belt	1 to 100	\$395	101 to 200	\$295	Over 200	\$195
Yellow Belt	1 to 200	\$195	201 to 400	\$95	Over 400	\$45
